

FREIOTHERM-Powder Coating

PP1301C

Characteristics	■ Powder coating for decorative use on exteriors ■ Application, e.g. in the vehicle construction sector ■ mat, smooth ■ Good mechanical resistance and surface hardness ■ Good light and weather resistance ■ Smooth to apply												
System Coating	■ System Liquid Coating For various applications, there are coatings available, whose optical appearance regarding colour, gloss degree and surface is in optimum balance.

Resistance Test	■ on zinc phosphatized steel plate ■ Condensate constant climate DIN EN ISO 6270-2 (CH) 1000 hours Water ingress Wb < 1 mm DIN EN ISO 4628-8 ■ Salt spray test (NSS) DIN EN ISO 9227 500 hours Water ingress Wb < 1 mm DIN EN ISO 4628-8 ■ Chemical resistance Needs to be checked. The temperature and concentration of chemicals have a major influence on the test outcome.												
Processing and application Dependent on plant and buildings	■ Processing / Loading Corona, Tribo ■ Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, rolling skin, wax and separating agent residue. If requirements are more demanding than this, we recommend appropriate levels of phosphatizing or chromating.

	■ Touch-up coating: on enquiry ■ Health & Safety at Work guidelines The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health & Safety at Work and environmental protection can be found in the corresponding safety data sheet.

Resistance to storage	■ Approx. 36 month in original packagings at an ambient temperature of 5 to 25 °C. Powder coatings must be stored in a cool and dry place. The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.																												
Specific comments	■ Protective screening: 160 µm ■ Compatibility with other powder coatings: Needs to be checked ■ Test conditions All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.
