Technical Datasheet

Characteristics	Cathodic electrocoat paint depositable 1K	
	■ Application, e.g. in the job coater sector	
	■ Pigment paste, fully neutralised	
	Primer	
	■ Good corrosion protection	
Technical / Physical Data	■ Binder-Base	Expoxy Resin, modified
	Colour	black Based on the specified colour template (i.e. RAL)
	Solid Mass DIN EN ISO 3251	55-59 %
	■ Density calculated	1,13 g/cm³
	■ Test layer thickness	20 μm
Mechanical Test	on zinc phosphate	
	Cross-cut-test DIN EN ISO 2409	Gt 0
	■ Erichsen index DIN EN ISO 1520	2,5 mm
Resistance Test	on zinc phosphate	
	■ Condensate constant climate DIN EN ISO 6270-2 (CH)	water ingress Wb <0,5 mm DIN EN ISO 4628-8
	■ Salt spray test (NSS) DIN EN ISO 9227	504 hours water ingress Wb <2 mm DIN EN ISO 4628-8
Processing and application Dependent on plant and buildings	Pretreatment The substrate must be free of adhesion-impairing substances such as oil, grease, rust, scale, rolling skin, wax and separating agent residue. For more demanding requirements on corrosion inhibiting properties, we recommend suitable conversion processes (e.g. phosphatizing).	
	Gloss value DIN EN ISO 2813	40-60 geometry 60°
	■ pH-Value	4,6-4,9
	Health & Safety at Work guidlines	
	The standard personal safety precautions must be observed when handling painting materials. Detailed information about dangerous goods, safety data and recommendations concerning Health & Safety at Work and environmental protection can be found in the corresponding safety data sheet.	
Curing	Object temperature Recommended baking temperature 20 Min./195 °C	
	green cross-hatching = bakir	g conditions with good final properties

Resistance to storage

One Turn-Over per year

Approx. 12 month in original packagings at an ambient temperature of 5 to 25 $^{\circ}$ C. Protect from frost. Open packages are to be used within a short time.

₹ ₹ ₹

The minimum storage stability of each batch is stated on the product label. The material does not necessarily become unusable if stored for longer than this period. However, for quality assurance purposes, an inspection of these materials is essential to ensure that they are still suitable for the intended application.

Specific comments

Test conditions

All information is based on a standard climate 23/50 DIN EN 23270. All information is based on our product knowledge an experience. We have no direct influence on the application itself. Please do not hesitate to contact us for further information.

The information provided here contains reference values and does not constitute a specification.
